## Anchored VWAP (AVWAP) System

**Objective:** Identify dynamic support/resistance levels and trend context using volume-weighted price anchoring.

**Core Tool:** Anchored VWAPs from significant price events (e.g., yearly open, local highs/lows).

**Signal Logic:** Trades are initiated near AVWAP levels, supported by ATR filters and SMA confirmation.

**Flexibility:** Adaptable to daily or intraday trading (5min/15min) for swing or day trades.

**Output:** Annotated charts and strategy tables showing entry signals, risk levels, and trend bias. Helps traders time entries in trending markets with strong volume-price alignment.

```
